TEACHING & SUPERVISORY EXPERIENCE

COLLÈGE JEAN-JACQUES ROUSSEAU | ENGLISH AS A FOREIGN LANGUAGE TEACHER

Oct 2026 - Apr 2027 | Thonon-Les-Bains, France

- Taught French middle school students foundational English language principles as well as nuanced everyday language through engaging activities centered around American culture
- As part of TAPIF (Teaching Assistant Program in France), shared classrooms with and taught alongside French staff

GUSTAVE EIFFEL ACADEMY | ENGLISH TEACHER

Jan 2026 - Jun 2026 | Saint Petersburg, FL

- Prepare daily English and Science classes to native French and English speakers with all classes centered on individual student skill levels and learning styles, focused on ability to communicate effectively and confidently
- Twenty hours per week, class sizes of five to nine students, first through fifth graders

PRIVATE FRENCH TUTOR

Oct 2025 - Jan 2026 | Saint Petersburg, FL

- Developed weekly lesson plans for beginner to intermediate French reading and speaking skills to elementary students through dynamic reading comprehension exercises as well as game based activities

CIEE | 150 HOUR TEFL CERTIFICATION

Aug 2025 - Oct 2025 | Saint Petersburg, FL

- Co-taught twenty hours of ESL (English as Second Language) college courses on grammar, vocab, and oral production
- Completed courses to develop intercultural competence and dynamic teaching styles to teach English as a foreign language

RIT | SWING DANCING INSTRUCTOR

Aug 2021 - Dec 2021 | Rochester, NY

- Fostered engaging and supportive dance community to encourage new and experienced dancers to learn and grow together
- Developed and taught weekly lessons for beginner to intermediate level swing and choreographed dance

RIT | NEW STUDENT ORIENTATION SUPERVISOR

Aug 2018, 2019, 2020 | Rochester, NY

- Directed 20 Orientation Leaders who each led their own groups of new students for RIT's New Student Orientation.
- Organized and assisted with large group ice breakers, welcome events and general activities throughout Orientation.
- An incredible test of perseverance and time management due to full days of social interaction and management.

RIT | COMPUTER SCIENCE COURSE TUTOR

Aug 2018 - Oct 2019 | Rochester, NY

- Develop weekly study sessions for students in Python and Java based Computer Science courses to provide a practical approach to course content. Collaborate with students in class and support their efforts in problem solving team dynamics.

FRENCH EXPERIENCE

ACADEMIC FRENCH STUDY

2011 - 2021 | PA & NY

- Completed a minor in college centered on oral communication, French film history, and professional interaction
- Intensive French courses from 7th grade through highschool at an IB HL / AP level

TIME IN FRANCE

2017 & 2022 | Strasbourg, Lyon, Annecy, Montpellier, Marseille, Paris

- **2017 - French Exchange** Highschool French Exchange where I spent one week in Paris and one week with a family in Montpellier, and attended high school classes. Exposed to casual / informal language and day to day French life
- **2022 - Couchsurfing** Solo traveled between Strasbourg, Annecy, Lyon, Marseille, Montpellier and Paris for three weeks. Communicated exclusively in French with locals in each city and lived with them for several days, sharing our cultures.

MARQUISE CAFÉ | HOST

Jun 2026 - Sep 2026 | Saint Petersburg, FL

- Speak French daily with French chefs in an authentic French café setting, focused on fast paced expression and comprehension of needs, requests, and questions, as well as longer form conversation

Previous experience as a Software Engineer

EXPERIENCE

USPTO | AI PATENT EXAMINER

October 2024 - August 2025 | Remote

- Rejected or allowed over 20 AI patents by comparing code, algorithms, and theory to current technology and research
- Performed extensive and efficient domain specific research and processed applications according to patent law

AMAZON | SOFTWARE DEVELOPMENT ENGINEER

Apr 2022 - Sep 2023 | Seattle, WA

- Designed and developed a web application displaying Alexa skill routing model metrics to improve model analysis time utilizing TypeScript, JavaScript, React, Python and AWS CDK.
 - Built dynamic frontend with features enabling user-customized data queries via live API interactions to custom backend which allows users to gain insights through individualized metrics and graphics.
 - Designed cloud data pipeline using a PostgreSQL database with a schema design utilizing an AWS CloudWatch trigger on daily Spark bash data collection job to curate data source for model analytics.
 - Implemented a Data Annotation Request Form for engineers and scientists into web application. Designed AWS system to increase efficiency of model routing performance experiments by eliminating data annotation bottleneck.
- Created components for offline development system to expedite LLM experimentation timeline for data scientists.
 - Created extensive runbook for LangChain experimentation in Python with support for multiple dev environments.
 - Developed infrastructure in AWS AppConfig to support parity between online and offline LLM systems.
- Integrated new API inference system into existing architecture using Java, enabling hundreds of APIs to onboard to new system, rolling out features across rapidly evolving LLM ecosystem.
 - Implemented Gradle build validation for developing APIs and new approval process for API teams.

AMAZON | SOFTWARE DEVELOPMENT ENGINEER INTERN

Jun 2021 - Aug 2021 | Seattle, WA

- Enabled Alexa scientists and engineers to monitor previously unavailable resource utilization data of Hyprank and Shortlister (skill routing) models by creating generic benchmark framework in Python.
- Created custom frontend to display CPU, GPU, and time usage metrics in secure environment, partnering with peer intern.

MITRE | SOFTWARE DEVELOPER INTERN

May 2019 - Aug 2019 | Bedford, MA

- Increased internal hiring speed potential from one month to one week with internal chatbot in Microsoft Teams to serve as intermediary between hiring manager and employees. Utilized Microsoft Bot Framework, Microsoft Graph, built with C#.

PROJECTS

COMPUTER SCIENCE HOUSE INTRODUCTORY EVALUATOR

- Developed a Tertiary Logistic Regression Classification Model for RIT's Computer Science House which predicts the intro process evaluation result of an applicant with 83% accuracy. Used Python, numpy and scipy in Jupyter Notebook to curate and clean data from PostgreSQL server, and experiment with and train model.

LIL LEXIE

- Developed Python backend for an Alexa skill which intelligently engages in a rap battle with the user.
- Leveraged NLTK's trigram tagger to identify parts of speech in user's rap and creates rap lyrics by rhyming with or using lyrics from the user. Won Best Smart Speaker Kit at HackDartmouth 2019.

EDUCATION

ROCHESTER INSTITUTE OF TECHNOLOGY

BACHELORS IN COMPUTER SCIENCE

Dec 2021 | Rochester, NY

RIT AI CLUB : PRESIDENT

COMPUTER SCIENCE HOUSE : EVALUATIONS DIRECTOR

NEW STUDENT ORIENTATION : ORIENTATION SUPERVISOR

COMPUTER SCIENCE DEPARTMENT : STUDENT AMBASSADOR

HONORS PROGRAM

LANGUAGES & SKILLS

Python | R | SQL | Matlab | Java | C | C# | C++
numpy | scipy | pandas | LangChain
Keras | Tensorflow | scikit-learn | pytorch
HTML | CSS | Javascript | Typescript | React
Data Processing | System Design | Modeling

HOBBIES

Running | Climbing | Snowboarding | Spikeball
Piano | Swing Dancing | French
